

Fundamentals of Grazing Management Workshop

TUESDAY, JANUARY 31, 2012

8:00 a.m. - 3:00 p.m.
(Lunch Provided)

The workshop is designed for beginning livestock producers and those who need a refresher on basic principles related to grazing management. Some of the topics covered will be managing stocking rates and densities, grazing behavior and multi-species grazing, system design and monitoring, and contingency planning. By the end of the day, participants will have the tools necessary to allow them to be more confident in setting-up and managing a sustainable livestock grazing system. The material will be equally useful for organic and conventional producers.
